ALI ARMANI

Frontend Developer (React, TypeScript, JavaScript)

armani.ali@proton.me | github.com/Ali-Armani | linkedin.com/in/aliarmani | aliarmani.vercel.app

SUMMARY

Frontend developer with hands-on experience across vanilla JavaScript and modern React/TypeScript projects. Independently delivered a complete e-commerce website for a real retail client, and am now leading its full-stack rebuild with React, TypeScript, and Supabase as the live product catalog grows. Built a bilingual (English-Farsi) learning app with full RTL/LTR support and WCAG accessibility practices, and a personal portfolio using React, TypeScript, and TanStack. Comfortable with remote and asynchronous collaboration. Currently deepening skills in Tailwind CSS and TypeScript.

TECHNICAL SKILLS

Core: HTML5, CSS3, JavaScript (ES6+), React, TypeScript, Semantic Markup, Responsive / Mobile-First Design
Accessibility & i18n: WCAG Practices (ARIA, keyboard navigation, reduced-motion support), RTL/LTR Internationalization
Backend & Data: Supabase (database, RLS security), serverless API routes
Tools & APIs: Git, GitHub, Chrome DevTools, Web Performance Optimization, localStorage, Web Speech API, Figma (basic)
Currently Learning: Tailwind CSS, TanStack ecosystem, TypeScript fundamentals

PROJECTS

4Kids Doll Shop — E-Commerce Website *Freelance Client Project (Remote)*

- Independently designed and built the original responsive e-commerce site from scratch for a real retail client using HTML, CSS, and JavaScript — from requirements through launch; conducted cross-browser testing and optimized images for a significant page-speed improvement.
- Now leading a full-stack rebuild of the same store in React, TypeScript, and Supabase (live product database with RLS security), as the real catalog of about 300 products is migrated and expanded.

Live: 4kids-shop.pages.dev

Personal Portfolio — React, TypeScript, TanStack *Personal Project*

- Designed and built a personal developer portfolio with React, TypeScript, and the TanStack ecosystem, applying modern frontend tooling beyond vanilla JavaScript.

Live: aliarmani.vercel.app

Vocab Bridge — Bilingual English-Farsi Learning App *Personal Project*

- Built a bilingual vocabulary flashcard app with full UI language switching between English and Farsi, including live document direction (RTL/LTR) and per-element lang/dir handling.
- Implemented WCAG accessibility practices: skip link, ARIA live regions and labels, keyboard-operable controls, and reduced-motion support; integrated the Web Speech API for pronunciation.

Live: ali-armani.github.io/vocab-bridge

Weather Forecast App *Personal Project*

- Built a weather lookup app fetching live conditions for any city via a third-party API, routed through a backend serverless function to keep the API key secure and off the client.

Live: weather-forecast-chi-six.vercel.app

EDUCATION

B.A. in English Language Teaching *In Progress — Expected Graduation July 2027*

- University of Mazandaran (Babolsar) — public university. Current GPA: 15.26/20.
- Self-taught web development (HTML, CSS, JavaScript, React) in parallel with formal studies.

LANGUAGES

Persian: Native
Turkish: Fluent (lived and worked in Istanbul)
English: B2 (Upper-Intermediate)
German: A2
